

DAYSPOT GROW LIGHT INSTALLATION INSTRUCTIONS

Carefully remove fixture (reflector) from box. Center it and thread it onto black socket all the way.

Screw grow bulb into black fixture socket.

Using the clamp arm, attach fixture in desired location. (NOTE: 60W fixtures should be mounted at least 12" away from plants and 150W fixtures at least 18" away. (See Illumination Chart on package.)

Point the reflector in desired direction and tighten wing nut to hold in position.

Plug the unit into 120V outlet.
