

1. Place Coco Coir Block in water-tight container.

2. Add water over block-soak 5-10 minutes.

3. Mix to wet all, remove excess H₂O and use!

USAGE CHART

Full Block + 7 Gal H₂O = (approx.) 2 cubic ft.*

For full bag use a 25 gallon container or large to medium wheelbarrow to hydrate

1/3 Block* + 2.3 Gal H₂O = (approx.) .5 cubic ft.*

Perfect for 2 gallon pots.

2/3 Block* + 4.6 Gal H₂O = (approx.) 1 cubic ft.*

Perfect for 4 gallon pots.

*For individual container use, follow yellow dotted lines at edges of label to slice content into thirds. Compression rate is 4-to-1.
