

- **Protect plants from Whiteflies, Aphids, and other flying insects.** Peel trap apart, reverse fold, **sticky side out.** Hang with supplied twist-tie from branch or stake at plant level. Place traps every seven feet or at end of each row.
- For badly infested plant, shake it gently and flies will swarm a few moments before they fly to your nearby trap like iron filings to a magnet!
- Thrips, leaf miners, gnats, fruitflies, leafhoppers and froghoppers are also attracted to these traps.
- **Lasts all season,** even in rain, or until completely coated with insects or dust.
- **Utilize el Yellow Sticky Trap (Trampas Pegajosas Amarillas)** para proteger plantas contra **Aphididae, Aleyrodidae, Thripidae, Cicadellidae, Cercopoidae, y Moscas de Fruta.** Abra la trampa, dobla al revés, **lado pegajoso afuera.** Coloca trampas cada dos metros o al extremo de cada fila.
