Actively Aerated Compost Tea for Restoring Soil and Plant Health

Benefits of using Nature Technologies Solution

The following benefits of creating healthy soil foodwebs utilizing extractions from high quality materials have been reported by research scientists:

Outcompetes Pathogens

Outcompetes disease-causing organisms and pests

Creates Protection Buffer

Consumes pathogens and pests

Improves Food Quality

Improves the nutritional quality of edible plants

Improves Soil Structure

Oxygen diffusion, improving water infiltration, & water-holding capacity

Helps Retain Soil Nutrients

Retains nitrogen & nutrients like calcium, iron, potassium, phosphorous, etc.

Makes Nutrients Available

For optimal plant growth, helps plants utilize nutrients

Decomposes Plant Residues

Rapidly

Reduces Worker Exposure

To potentially harmful chemicals and pesticides

Produces Hormones

That help plants grow vigorously

Improves Plant Growth

Increases plant yields

Decreases Water Usage

Increases water holding capacity
