

Prescription Treatment® brand Green-Shield® CA Disinfectant & Algicide ...
Is a biodegradable liquid concentrate for horticultural use. It's the first step to a successful disease management program.

Labeled for use in ...
Greenhouses, Nurseries, Landscapes and Interiorscapes on work areas, benches, tools, containers, walkways, floors and evaporative cooling pads. GreenShield CA is labeled for use only in California.

Green-Shield CA controls ...
Fungal, bacterial and viral plant pathogens, and algae.

The active ingredients, a blend of quaternary amines ...
Have been scientifically formulated for the greenhouse environment.

Why Green-Shield CA vs. bleach?

- Kills some pathogens that bleach does not.
- Lasts longer than bleach in solution.
- Registered for use with the EPA.
- Less irritating to use.
- Biodegradable.
- 1 gallon of Green-Shield CA is equivalent to 28 gallons of bleach.
- Causes no damage to clothing from splashes.
- Provides residual control as long as the surface stays wet.

Green-Shield CA provides ...

- An efficient first step in the control of fungal and bacterial diseases.
- Control of algae on walkways, greenhouse coverings and evaporative cooling pads.
- Broad spectrum control of diseases and algae where they hide — on floors, benches and walls.
- Control of dormant fungal and bacterial structures that fungicides do not kill.

Operational Benefits

Green-Shield CA disinfectant & algicide is a simple, cost-effective way to control unwanted plant pathogens and algae around greenhouse and nursery operations. Green-Shield CA can be used as part of an IPM pre-crop clean-up program or may be used during the cropping cycle to provide routine control of diseases and algae on benches and walkways.

Unlike bleach, Green-Shield CA is EPA registered for the control of pathogens and algae in and around greenhouses. Green-Shield CA lasts four times longer in solution than bleach, without the odor, irritation and volatility of bleach.

Product Specifications:

- Active Ingredient: a blend of quaternary amines
- Reentry Interval: none
- Sizes: 1 gallon (four per case) and 15 gallon drum
- Application Rates:
For surface disinfection and algae control — 1 Tbl. per gallon
For algae control in evaporative cooling pools — 1 tsp. per 15 gallons of makeup water every other week
- Signal Word: DANGER — Eye, skin and throat irritant in its concentrated form only. Goggles and rubber gloves are required when handling the concentrate.

At the recommended rate of .6%, the activity of the bleach solution decreases by 50% every 4 hours.

At the recommended rate of .08%, the activity of Green-Shield CA continues at full labeled strength for over 8 hours.
