Route of Entry	<input checked="" type="checkbox"/> Skin Contact	<input type="checkbox"/> Skin Absorption	<input checked="" type="checkbox"/> Eye Contact	<input checked="" type="checkbox"/> Inhalation	<input checked="" type="checkbox"/> Ingestion
[Emergency Overview]	Skin Contact - Irritation could occur with prolonged exposure to dry fertilizer or solution. Eye Contact - Irritation could occur if dry fertilizer or solution contacts eyes. Inhalation - very low vapour activity, could produce noxious fumes and respiratory tract irritation if heated. Ingestion - Excessive ingestion may result in health hazard. Effects may include nausea, vomiting, diarrhea, weakness or convulsions

SECTION 4 — FIRST AID MEASURES

Skin Contact	Remove contaminated clothing. Flush affected area with water for 15 minutes. Wash affected area with mild soap and water. Get medical attention if irritation develops or persists.
Eye Contact	Immediately flush eyes with plenty of water. Remove any contact lenses (if easy to do) and continue flushing for 15 minutes. Get medical attention if irritation develops or persists.
Inhalation	Remove person to fresh air. Seek medical attention immediately if breathing becomes difficult.
Ingestion	Immediately rinse mouth out with plenty of water. If within 30 minutes after ingestion, give person a small glass of water or milk. NEVER give anything by mouth to an unconscious person. Do not induce vomiting unless instructed to do so by a physician or poison center. Seek medical attention immediately.
