EZ LOCK-N-RELEASE SPOOL PLANT SUPPORT

With 105' of UV Resistant Twine Product #740210

INSTRUCTIONS

1. Hang EZ Lock-N-Release Spool Plant Support from secure overhead support line by pushing down on Spool Release Lever. Once unit is hooked onto overhead support line the Spool Release Lever will help prevent it from slipping off.
2. Push Spool Release Lever (by squeezing in the middle of the unit) to unlock spool and feed out desired length of support twine. When lever is released, Spool Locking Tab prevents twine from feeding off of spool.
3. Secure plants to Spool Line using clips or ties. Good choices include the Grower's Edge Crop ClipTM (#740047) and/or Vine Clips (#740045).
