

VAPORIZER COMMERCIAL GRADE

INSTRUCTIONS **Product #740650**

This Commercial Grade Vaporizer is a great way to combat many common problems. Advanced PTC element technology offers more consistent heating than other vaporizers, regardless of ambient air temperatures. With no moving parts and no manual adjustments or calibration, this unit is extremely reliable and easy to use.

Operating Temperature: The proprietary heating element technology used in this vaporizer will maintain a constant temperature of 285°F (141°C) +/- 4%.

Treatment Area: Each Commercial Grade Vaporizer may be used in any size area up to 1000 sq. ft.

Usage: Place on a flat, non-combustible surface or suspend in a safe place with jack chain (DO NOT USE ROPE OR CORD) at least 3 feet from any combustible surface. After operating temperature is reached (about 20 minutes), the Vaporizer should be used for 30 minutes each day initially, then at shorter times as problems are reduced and/or eliminated. Extraction fans within the immediate area should be switched off during use. Oscillating fans should remain on lowest setting to ensure even coverage.

NOTE: Please read Important Safety Precautions below:

IMPORTANT SAFETY PRECAUTIONS!

WARNING! Unit is HOT during operation. **DO NOT BUMP OR TOUCH** unit while in use. Vaporizer housing and/or contents may cause serious burns to exposed skin!

No alterations or repairs can be carried out on the Vaporizer other than by the manufacturer.

Use only with properly registered materials. Follow all safety and licensing guidelines where applicable.
