

MATERIAL SAFETY DATA SHEET
EMERALD TRIANGLE DEEP FUSION BLOOM

SECTION 1. MATERIAL IDENTIFICATION

Product Name: Deep Fusion Bloom

Chemical Family: aqueous solution of minerals and nitrates

Product Use: plant nutrient solution

Manufactured by: Emerald Triangle, P. O. Box 305, Fortuna, CA 95540
(707)-725-4119 Fax (707)-725-3747

For Emergency Day or Night Call: CHEMTREC – Domestic North America 800-424-9300,
International 703-527-3887 (collect calls accepted)

SECTION 2. INGREDIENTS AND OCCUPATIONAL EXPOSURE LIMITS

Ingredients – Deep Fusion Bloom is a mixture of chemicals for plant nutrition. Derived from: magnesium sulfate, phosphoric acid, potassium phosphate, magnesium nitrate and molasses.

Exposure Limits: Some of the chemicals used in Deep Fusion Bloom, when inhaled in a powder form, are known to be irritants to the upper respiratory tract. The product is an aqueous inorganic solution of phosphorus. As long as these chemicals remain in aqueous solution and do not become aerosolized, they are not an inhalation hazard.

SECTION 3. HAZARDS IDENTIFICATION

STRONG OXIDIZER. CONTACT WITH OTHER MATERIAL MAY CAUSE FIRE. HARMFUL IF SWALLOWED, INHALED OR ABSORBED THROUGH SKIN. CAUSES IRRITATION TO SKIN, EYES AND RESPIRATORY TRACT.

NFPA Ratings: 0 Flammability / 0 Reactivity / 1 Oxidizer

Potential Health Effects

Primary Entry Routes: ingestion, inhalation, and skin contact.

Target Organs: Gastrointestinal system, blood system, skin, mucous membranes.

Ingestion: Ingestion can cause severe gastro-intestinal distress, with abdominal pain, nausea, vomiting, and watery or bloody diarrhea.

Eye: May cause irritation, redness, and pain.

Skin: Irritation.

Inhalation: Irritation

Carcinogenicity: IARC, NTP and OSHA do not list as a carcinogen.

Medical Conditions Aggravated by Long-Term Exposure: Unknown

Chronic Effects: Repeated or prolonged exposure to some ingredients can produce target organ damage.

Other: None

Section 4. First Air Measures

Ingestion: Give several glasses of water for dilution and encourage vomiting. If symptoms persist, seek medical attention.

Eye Contact: Do not allow victim to rub or keep eyes tightly shut. Remove contact lenses then gently lift eyelids and flush immediately and continuously with flooding amount of water for at least 15 minutes. Consult a physician or ophthalmologist if pain or irritation develops.

Skin Contact: Wash exposed are with soap and water. For reddened or blistered skin, consult a physician.

Inhalation: Remove exposed person to fresh air and support breathing, if necessary. Consult a physician as soon as possible.

After First Aid: Get appropriate community medical support.

Section 5. Fire and Explosion Data

Flash Point: Unknown

Auto-ignition Temperature: Unknown

LEL: Unknown

Flammability Classification: Deep Fusion bloom is not combustible.

Extinguishing Media: Use dry chemical, carbon dioxide, water spray, fog or foam for extinguishing surrounding fire. .

Unusual Fire or Explosion Hazards: Container may explode in heat of fire.

Hazardous Combustion Products: Phosphorous oxides may form when heated to decomposition Magnesium Nitrate is an oxidizer and can intensify combustion of flammable substances.

Fire Fighting Instructions: Keep fire exposed containers cool with water spray. Remove containers from fire area, if it can be done safely. Do not release run off from fire control methods to sewers or waterways.

Fire Fighting Equipment: Because fire may product toxic thermal decomposition products, wear a self-contained breathing apparatus (SCBA) with a fullface piece.

Section 6. Accidently Release Measures

Spill/Leak Procedures: Wipe up with absorbent towels or mop.

Regulatory Requirements: Follow applicable OSHA regulations (29 CFR 1910.120).

Section 7. Handling and Storage

Handling Precautions: Avoid ingestion, skin contact, eye contact, and inhalation.

Storage Requirements: Keep in tightly closed containers stored in a cool, dry, ventilated area.

Regulatory Requirements: Follow applicable OSHA regulations

Section 8. Exposure Controls/Personal Protection

Engineering Controls: Provide general or local exhaust ventilation systems to maintain airborne concentrations as low as possible.

Administrative Controls: Avoid breathing mist.

Respiratory Protection: If this product is used a directed, respiratory protection is not required. Seek professional advice prior to respirator selection and use. Follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary, wear a MSHA/NIOSH –approved respirator. If respirators are used, OSHA requires a written respiratory protection program that include, at least: medical certification, training, fit testing, periodic environmental monitoring, maintenance, inspection, cleaning, and convenient, sanitary storage areas.

Eye Protection: When handling Deep Fusion Bloom, protective eyewear or goggles should be worn per OSHA regulations (29 CFR 1910.134). Contact lenses pose a special hazard. Soft lenses may absorb irritants, and all contact lenses concentrate irritants. Particles may adhere to contact lenses and cause corneal damage.

Protective Clothing: Wear when the possibility of skin or clothing contamination may exist. Wear neoprene or nitrile gloves when directly handling the product.

Safety Stations: Eye wash stations, quick drench showers, and washing facilities should be readily accessible to workers handling large quantities of Deep Fusion Bloom.

Contaminated Equipment: Remove this material from shoes and equipment. Launder contaminated clothing before wearing.

Comments: Never eat, drink or smoke in work areas. Practice good personal hygiene after using this product, especially before eating, drinking, smoking, using the toilet, or applying cosmetics.

Section 9. Physical and Chemicals Properties

Physical State: Aqueous solution.

Density: 1.162

pH: 3-4

Appearance: Liquid with slight odor of molasses

Vapor Pressure: Unknown

Water Solubility: Soluble

Other Solubilities: Unknown

Freezing Point: -30 degrees F

Viscosity: Unknown

Section 10 Stability and Reactivity

Stability: Stable at room temperature in closed containers, under normal storage and handling conditions. Unstable at high temperatures.

Polymerization: Hazardous polymerization does not occur.

Chemical Incompatibilities: Many compounds for insoluble phosphates when contacting Deep Fusion Bloom.

Conditions to Avoid: High temperatures.

Hazardous Decomposition Products: Phosphoric oxides may form when heated to decomposition.

Section 11. Toxicological Information

Most of the chemicals in Deep Fusion Bloom are toxic by ingestion, inhalation or dermal contact.

Section 12. Ecological Information

Ecotoxicity: Unknown

Environmental Fate: Not expected to be significant.

Environmental Degradation: Unknown

Section 13. Disposal Considerations

Waste Disposal: Follow Federal, State and local regulations.

Section 14. Transportation Information

DOT Transportation Data (49 CFR 172.101): Nitrates, inorganic aqueous solution. Concentrations of Deep Fusion Grow, at the minimum temperature encountered during normal transportation, will not exceed 80% of the saturation limit. It is exempt from labeling (see code 58 of 49 CFR 172.102).

Section 15. Regulatory Information

EPA Regulations: Not listed

Section 16. Other Information

Emerald Triangle Deep Fusion Bloom is a plant nutrition product. Information assembled for this Material Safety Data Sheet is for the use of this product as intended by the manufacturer. Users should take all precautions recommended herein while working with this product.

Emerald Triangle Products provides the information contained herein in good faith, but makes no representation as to its comprehensiveness or accuracy. This document is intended only as a guide to the appropriate precautionary handling of the material by a properly trained person using this product. Individuals receiving the information must exercise their independent judgment in using this product
